Use Case #1: Blockchain enabled Digital Rights Management

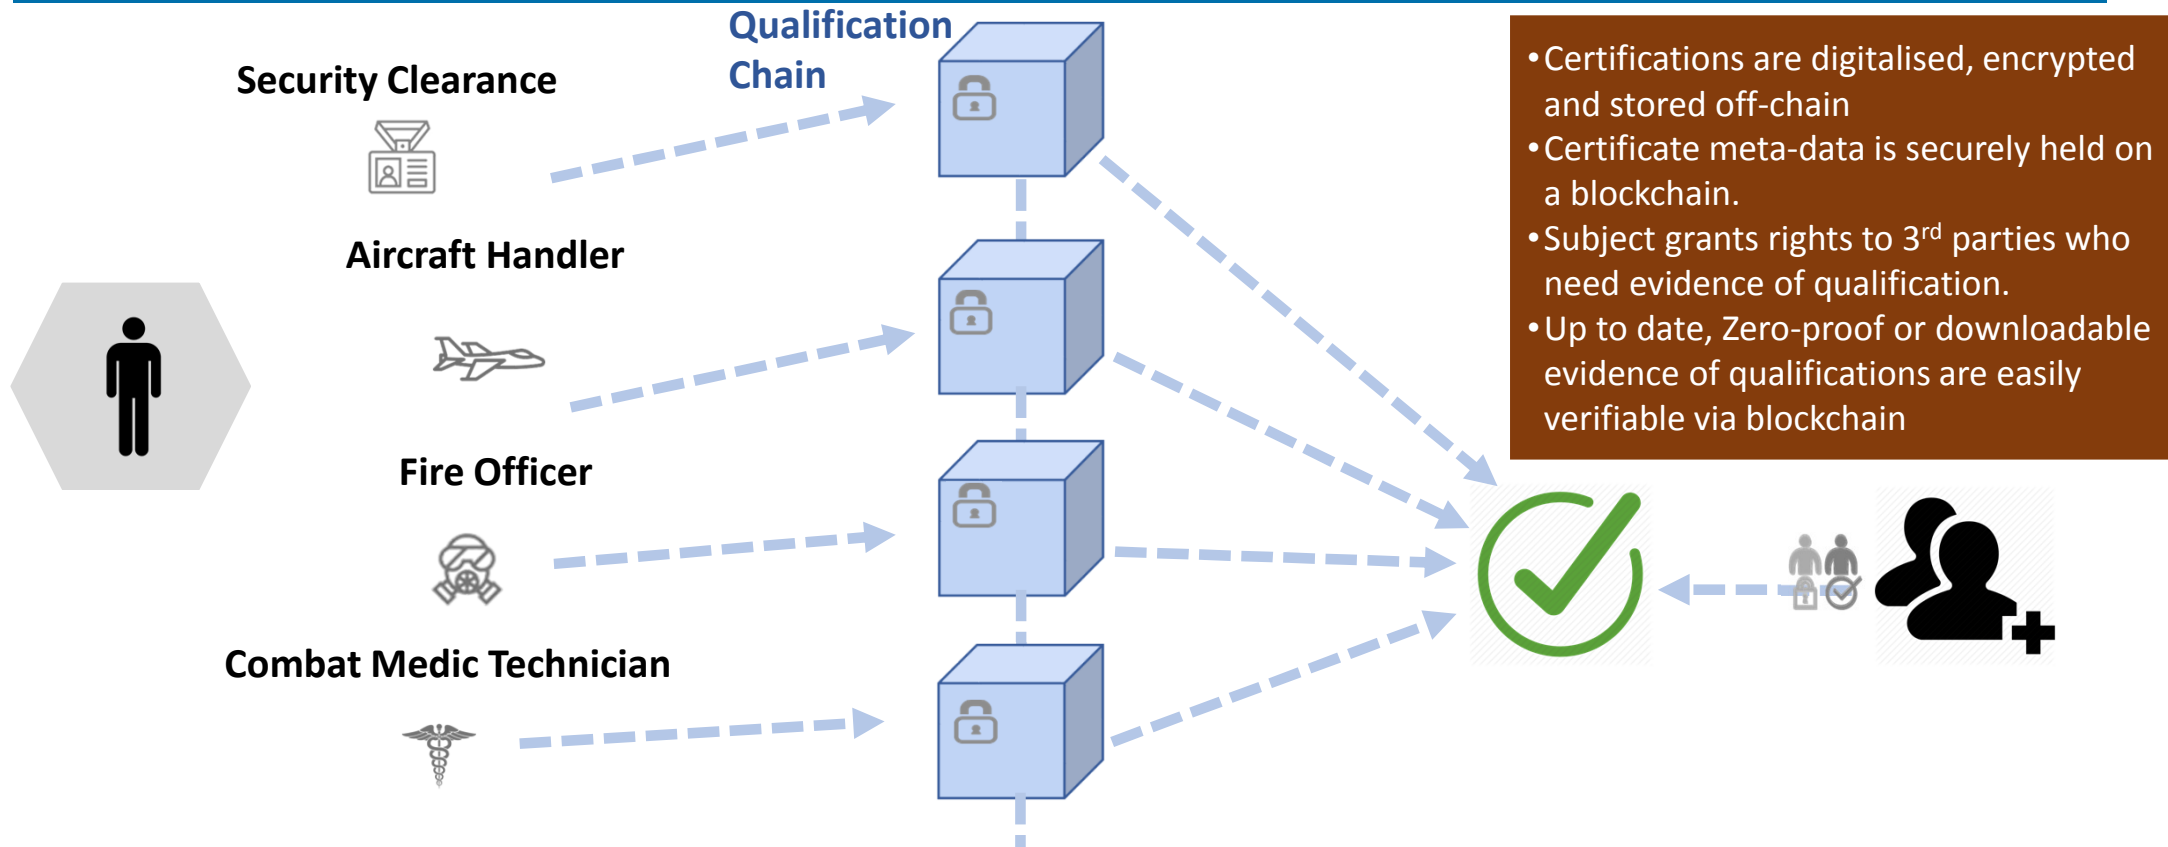

- Is the design genuine?
- Do I have the rights to use the design?
- How do I protect my IP?
- How do I know where my design has been used?

Use Case #3: Blockchain enabled Qualifications

Your trusted **collaboration** partner

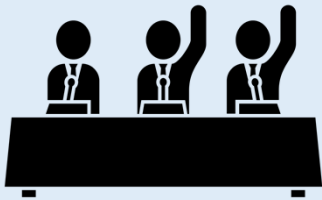

Atos

Some things to think about...

How will you link Physical and Digital ID's?

One size will not fit all.
Think about "Chain bridges"

Consensus groups may come and go.
Who controls the interest?

Avoid "Chain" lock-in.

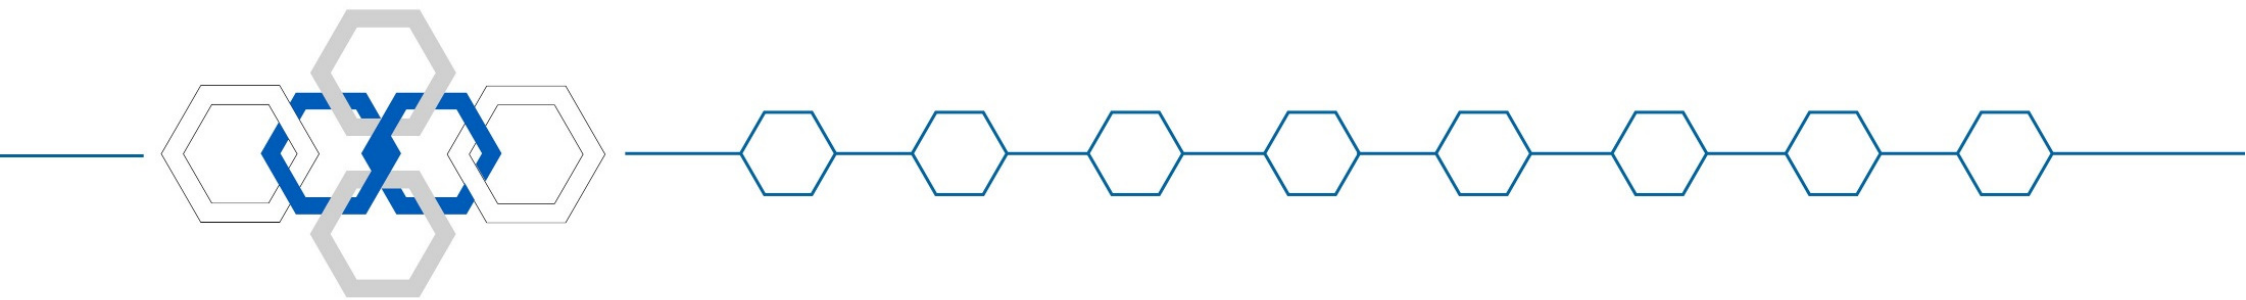

Ensure Chain longevity
(Security, scalability and operability)
